

RS TELEMATICS FLEET MANAGEMENT

As a brand, **PetroMan South Africa (SA)** was established in **2001**. As a business and OEM, our experience and know-how traces back to **1999** when our journey to producing a sophisticated, multiple-product, fully automated fuel management system (FMS) started. The FMS is called **PetroMan** and is regarded with high prestige by dozens of successful users across several industries globally. **PetroMan SA** is the official supplier of the **PetroMan** FMS in South Africa.

Further development, growth, and offering expansion has today established **PetroMan SA** as not only a leader in the FMS space, but also in asset optimisation.

The design, flexibility, and reliability of our technology enables superior system functionality, effectiveness and efficiency. This competitive advantage allows **PetroMan SA** to successfully provide, and implement, comprehensive, leading-edge asset optimisation solutions at significantly lower costs compared to conventional offerings.

EFFICIENT, EFFECTIVE, CUSTOMIZABLE, AND USER-FRIENDLY FLEET MANAGEMENT.

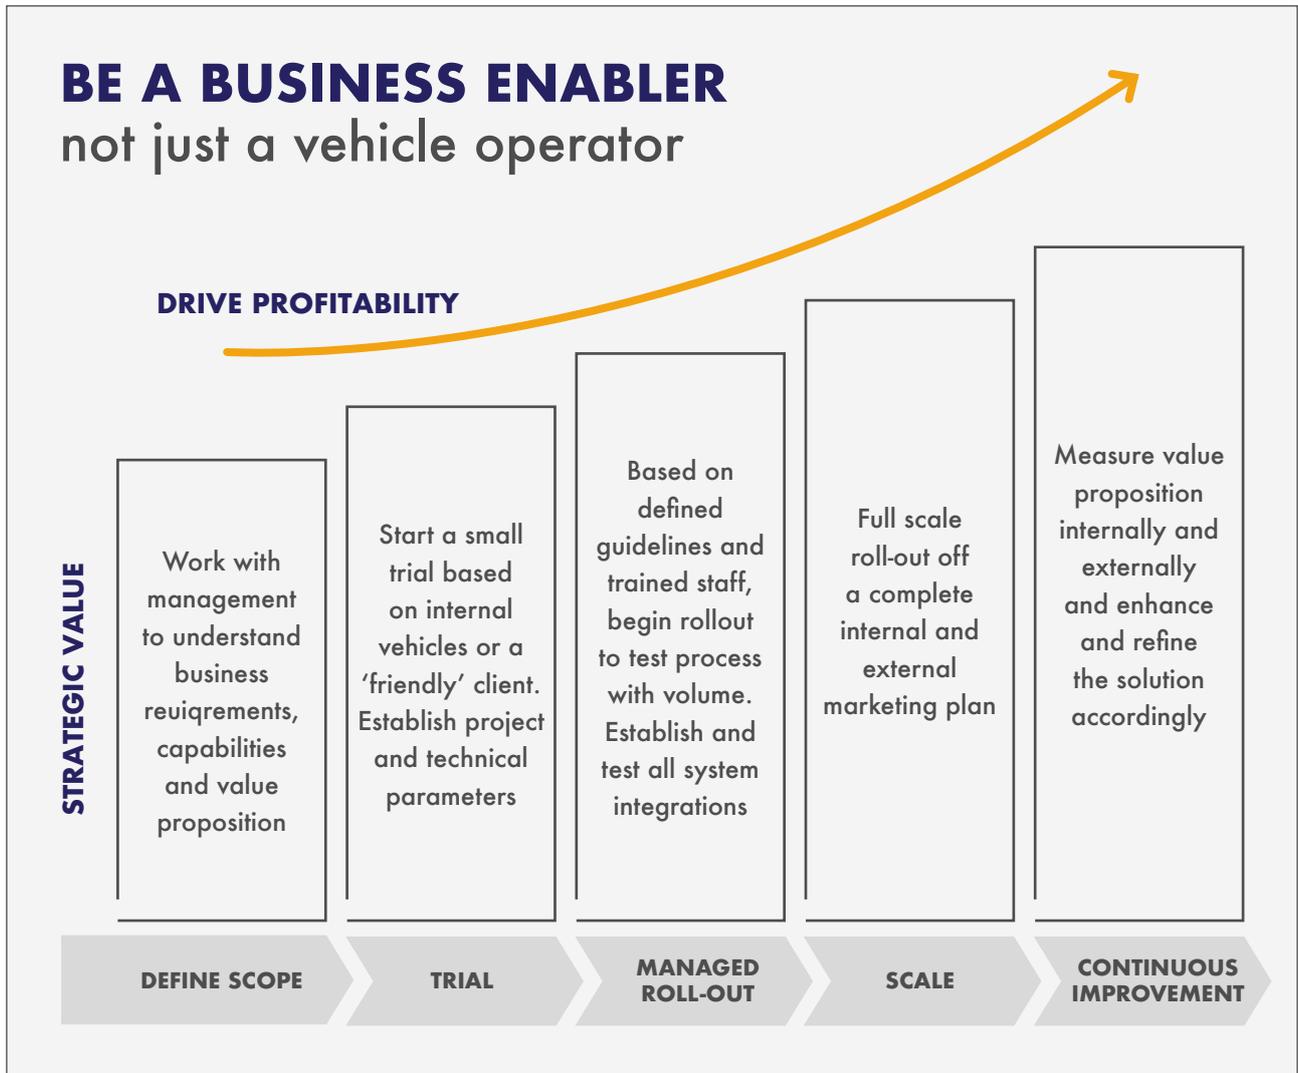

Fleet telematics solutions improve operational efficiency as well as provide data for strategic decisions, such as right-sizing your fleet, planning daily routes, and making equipment and vehicles visible to the team.

Telematics monitors, displays, and communicates a wide range of information relating to an individual vehicle or an entire fleet including vehicle location, driver behaviour, engine diagnostics and vehicle activity. The real value comes from full access to utilization records in real-time that you can use to improve productivity of your assets and team. Telematics helps fleet operators to identify, and rectify, inefficient processes and asset deployment.

EFFICIENCY IS VITAL TO PROFITABLE BUSINESS,
and that is the business we are exceptional at.

Our **RS Telematics** SaaS Telemetry Platform is fully customizable and supports over 100 devices from more than 40 different hardware providers, and more are added every day. Pick the right device for the job and forget about vendor lock-in. You can take immediate advantage of already-integrated hardware, or contact us to discuss a bespoke, specific device-integrated solution, free of charge.

Our versatile solution is modular and designed to accommodate the fleet owner's existing equipment in the most cost-effective way. This is achieved by offering two options. The options are distinguished as follows:

RS Telematics Fleet Management - Lite
Software-only Option
Integrates with existing fleet hardware
Fully customizable

RS Telematics Fleet Management - Premium
Software and Hardware Option
Comprehensive, software-plus-hardware package
Fully customizable

The **features** of both options of our **RS Telematics Fleet Management** solution include:

General vehicle and fleet tracking
(speed, odometer, etc.) –
'always-on' visibility

Driver behaviour monitoring (including
live camera tracking) and reporting

Pro-active notifications

Flexible accident reporting including
incident alarms and alerts

Geographic area management
(geofencing)

Telematics platform integration and
multi-device support (including fuel
management options)

Fully customizable

The **benefits** of both options of implementing our **RS Telematics Fleet Management** solution include:

Increased operational efficiency
(route and vehicle usage optimisation)

Improved competitiveness

Real-time, accurate reporting data
(standard and custom)

Reduced maintenance costs
(proactive scheduling)

Unauthorised movement reporting

Simple, flexible, pay-as-you-go
pricing models

Zero maintenance

Our competitive edge ultimately lies in **FINDING THE PERFECT BALANCE** between man and machine, between technology and a human touch.
